Strong Sales for New Polished Copper Finish

Having identified a trend towards a warmer palette of colours in interior design, and in particular the increased popularity of copper, Varilight has launched a new Polished Copper range of decorative wiring accessories. There are early signs of strong sales for the new finish, which is already outselling other, well-established finishes.

The comprehensive range assortment includes Varilight's industry-leading LED dimmers, rocker and toggle switches as well as sockets with USB charging ports. Varilight Polished Copper faceplates are bevel-edged and are paired with black switch and socket inserts.

New This Month: MJP120: A New Product Code For Our 120W V-Pro LED Replacement Dimmer Module

To bring the product code for the 120W V-Pro LED replacement dimmer module inline with other models, we have changed the product code from Z0JP250-P to MJP120. The **MJP120**, rated at 120W and suitable for up to 10 lamps, now sits alongside the **MJP300** which is rated at 300W for dimmable LED lighting with a maximum of 30 lamps.

V-Pro dimmers offer unrivalled compatibility and both models benefit from the full suite of features that make the V-Pro series the market-leading LED dimmer.

- Widest Compatibility
- Choice of 3 Dimming Modes to Optimise Performance
- Adjustable Minimum & Maximum Brightness Settings
- Drive Function Boosts Low Brightness Start-Up
- Child Lock

Brushed Bronze

For a contemporary twist on a classic finish, choose the Varilight Brushed Bronze Screwless range.
