Doyle and Tratt's VARILIGHT V-Pro Dimmer Tops Independent Test

Results of an independent test published in the August edition of [Lux Review](#) demonstrate the versatility of the **Varilight V-Pro Dimmer**.

"It worked straight out the box and gave smooth operation with all lamps." Lux Review, August 2016
Read the full article [here](#) (The article refers to the dimmer using our company name, "Doyle and Tratt V-Pro")

Up against several other LED dimmers and tested across a wide selection of dimmable LED lamps, the **V-Pro dimmer** came out on top. High grades were awarded to the V-Pro dimmer for its performance with each of the lamps tested and particular mention was made of the V-Pro dimmer's ability to dim to very low brightness levels.

This is the latest in a series of accolades for **V-Pro dimmers** which are now available in two ratings, one for up to 10 LED lamps (max. 120W) and a higher-rated dimmer

- 

Optimum control of dimmable LEDs
- 

Ideal for halogen - mains or low voltage
- 

Setting the standard for lighting control
- 

Equipped for larger LED loads (up to 400W)
- 

Dimmable electronic transformers for 12V halogens and LEDs.
- 

VARILIGHT grid switch range including dimmers, switches and fuse holders.
- 

- 

- 

- 

for up to 30 LED lamps (max. 300W), across the entire Varilight range of decorative finishes. Grid versions are also available for **Varilight PowerGrid** and as a Multi-Grid version for MK, Crabtree and Schneider grid systems. Replacement modules for standard dimmer faceplates are also available.

It is also possible to purchase remote control V-Pro dimmers which have the added advantage of multi-point dimming, including a **grid version of the Eclique2 series** for the Varilight PowerGrid range.
