

## Introducing V-Pro MultiPoint Dimmers

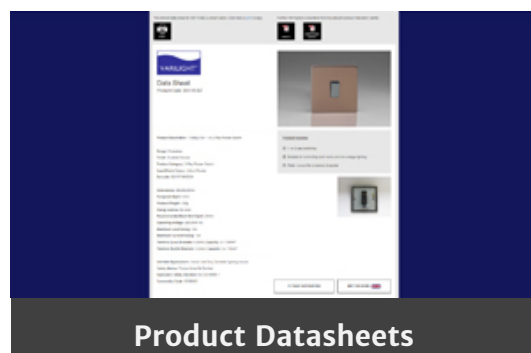

V-Pro MultiPoint is an extension of Varilight's industry-leading V-Pro LED dimmer series to enable dimming from multiple switch locations. The new MultiPoint Touch master dimmer can be used with any number of dimming slaves, ideal on a stairway or in an open-plan living space when the same lights are controlled from more than one switch location in a 2-way or multi-way circuit.

MultiPoint Touch is launched alongside MultiPoint Remote (formerly known as Eclique2), where the master dimmer can also be controlled via an IR remote controller, such as Varilight's YRE8 handset, which offers enhanced control with scene-setting capabilities when the lighting in a particular room is split across more than one circuit.

Past Issues

Datasheets for our entire range are available on our website.

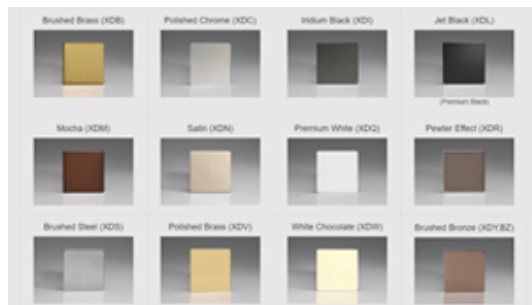

Search using the product code or use our Product Configurator tool [www.varilight.co.uk/configurator](http://www.varilight.co.uk/configurator)

We've increased the assortment of products available in our [Antimicrobial Copper](#) range of wiring accessories. The range, designed for use in hospitals, care homes and other environments where sanitation is a priority, now includes 1-gang 10A intermediate switches, 3- and 4-gang 10A 2-way switches and DataGrid faceplates suitable for pairing with our wide range of data modules.

Extensive laboratory testing has proven that Antimicrobial Copper continuously kills pathogenic microbes and inhibits the build-up and growth of bacteria, achieving 99.9% reduction within two hours of exposure between routine cleaning.

### Screwless Style

Varilight TV brings you a wide range of [how-to videos](#), including how to fit Screwless Wiring Accessories. With an incredible array of decorative faceplates alongside the new Screwless PowerGrid system for versatile grid wiring, the Varilight Screwless range is unrivalled in breadth of assortment and style.
